

BEAD POODLE

- Cut off a string of 16 beads.
- First bead is the nose.
- The first four beads actually make up the head.
- Hold the first bead with the fifth bead together and lock twist the group of three. This forms the head.
- The next bead (5) becomes the neck.
- Hold bead 5 and bead 9 together and lock twist the group of four. This now forms the front legs.
- The next bead (10) becomes the body.
- Hold bead 10 together with bead 15. Lock twist this group of four. This now forms the back legs, leaving the last two beads as the tail.

A little shaping up may be needed as well.
